

# ADOBE® LIVECYCLE® PDF GENERATOR ES

Automate the creation, assembly, distribution, and archival of Adobe PDF files in combination with critical business processes.

## Adobe LiveCycle ES

Adobe LiveCycle ES (Enterprise Suite) software is an integrated server solution that blends data capture, information assurance, document output, process management, and content services to help you create and deliver rich and engaging applications that reduce paperwork, accelerate decision making, and help ensure regulatory compliance.

## Streamline Adobe PDF file creation

A server-based solution, LiveCycle PDF Generator ES software can be used to centrally deploy and manage the creation of Adobe PDF files across the enterprise. Employees can easily convert most documents created within an organization into the ubiquitous PDF format. For organizations using PDF documents to share information or as part of an archiving solution, the flexible deployment options in LiveCycle PDF Generator ES will complement existing core business systems and processes.

## Manage Adobe PDF file creation and conversion on a central server

LiveCycle PDF Generator ES makes it easy to include centralized PDF file creation within established business applications and processes. Many deployment options, such as network watched folder, e-mail, web user interface, virtual print driver, or Java™ APIs, allow customization of how employees create PDF documents. LiveCycle PDF Generator ES creates PDF documents from virtually any file type. In addition, ensure that all PDF documents generated within the organization are optimized for file size, resolution, and security to support established business processes, corporate guidelines, or government regulations.

## Adapt PDF documents for new purposes

Assemble, disassemble, and manipulate PDF documents using LiveCycle PDF Generator ES.

It extends many of the PDF document assembly features of Adobe Acrobat® desktop products to the enterprise server, providing an automated, high-volume solution for customized communications. Assemble content from diverse sources and file formats into a single PDF package that includes cohesive pagination, indexing, resizing, addition of headers and footers, insertion or deletion of pages, and creation of a table of contents—all according to established publishing requirements.

## Share and store business-critical documents in a consistent format

Whether employees are communicating with customers, submitting regulatory filings, or sending final document proofs for printing, LiveCycle PDF Generator ES helps improve business process efficiency by leveraging a single, standard document format. Organizations can simplify content management and streamline archiving processes by automatically converting source documents or existing PDF archives into PDF/A, the ratified ISO standard for long-term archiving of digital records. With the ability to create searchable PDF documents, LiveCycle PDF Generator ES allows you to quickly find and access information, as well as comply with government regulations. LiveCycle PDF Generator ES makes it easy to convert PDF documents to other file formats such as TIFF, PNG, JPEG, and HTML, when those formats are used in corporate systems.

### System requirements

Adobe LiveCycle ES supports market-leading operating systems, web application servers, and databases. For platform support and system requirements, visit [www.adobe.com/products/livecycle/systemreqs.html](http://www.adobe.com/products/livecycle/systemreqs.html).

### Create Adobe PDF files from a wide range of file formats

For more information on specific versions or formats supported, visit [www.adobe.com/go/pdf\\_generator\\_supported\\_formats](http://www.adobe.com/go/pdf_generator_supported_formats).

- Microsoft Office
- OpenOffice.org
- Microsoft Visio
- Microsoft Project
- Autodesk AutoCAD
- Corel WordPerfect
- Adobe Photoshop®
- Adobe FrameMaker®
- Adobe PageMaker®
- Print files (PS, PRN, EPS)
- Web files (HTML)
- Image formats (JPEG, GIF, BMP, TIFF, PNG)

### Convert PDF files to industry-standard formats

- Text (TXT, RTF, accessible)
- Web (HTML)
- Images (TIFF, multipage TIFF, PNG, JPEG)
- Print (PS, EPS)
- PDF to PDF (PDF, PDF/A, PDF/X)

### Build extended processes with additional solution components

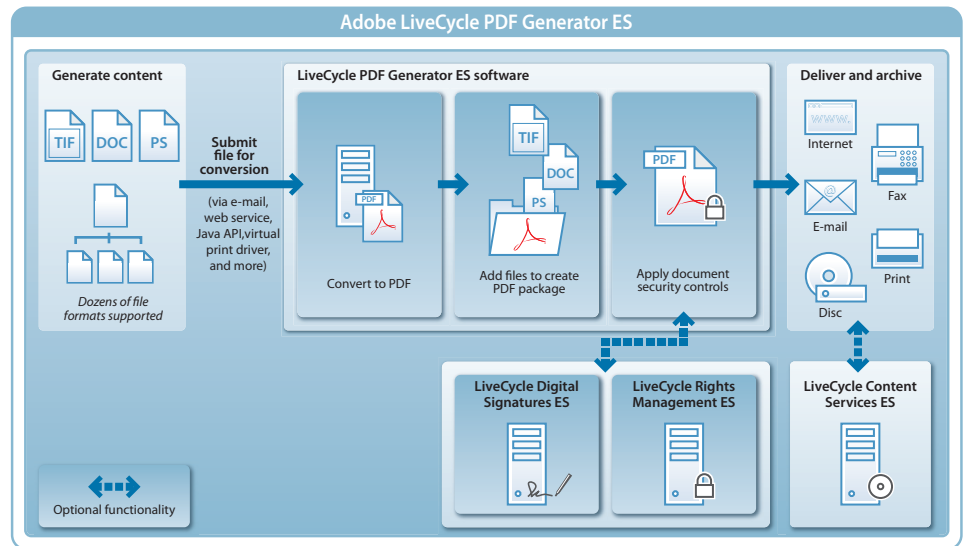

LiveCycle PDF Generator ES integrates with other LiveCycle solution components to support enhanced work processes such as document reviews or approval processes involving customers, partners, or suppliers. For instance, you can create and publish certified documents or generate document packages that are ready to be signed with Adobe LiveCycle Digital Signatures ES software. Encrypt files with LiveCycle Rights Management ES to apply persistent and dynamic policies to Adobe PDF files, allowing you to maintain confidentiality, control use, and manage availability. Or, store PDF or PDF/A files for easy retrieval with Adobe LiveCycle Content Services ES. In addition, route assembled and secured PDF documents to stakeholders for review and resubmission using workflows created with Adobe LiveCycle Process Management ES software.

### Create searchable documents from image files

LiveCycle PDF Generator ES provides enterprise-class conversion technology that can transform flat image files into searchable PDF files using optical character recognition (OCR). This is especially useful when converting from image file formats such as TIFF. The conversion process associates character shapes with the characters they represent. When the PDF file is viewed in Adobe Reader® software, it retains the format and integrity of the original document and has full search capabilities. Users have complete access to information in the document—they can select and search for characters or use automated search tools.

### Adobe LiveCycle PDF Generator in Action

Adobe LiveCycle PDF Generator ES automates the conversion, assembly, and distribution of Adobe PDF files. Add other Adobe LiveCycle solution components to improve security, store documents for easy retrieval, or automate human-facing processes.
